Table of Contents

Highlights 1
Demand and Incomes 3
Ontario Production By Industry 7
Ontario Economic Accounts: Summary 1999:1-2002:4 12
List of Tables 15

HIGHLIGHTS

- Ontario's **real GDP** grew by 3.8% in 2002, more than double the 1.5% pace in 2001. Ontario's economy outperformed both the Canadian economy which advanced 3.4% and the U.S. economy which grew 2.4% in 2002.

- **Final domestic demand** increased by 3.3% in 2002, as consumer demand picked up and housing investment surged.

- **Real consumer spending** growth accelerated to 3.3% in 2002 after slowing to 2.3% in 2001. Demand was strongest for durable goods, especially furniture, appliances and autos.

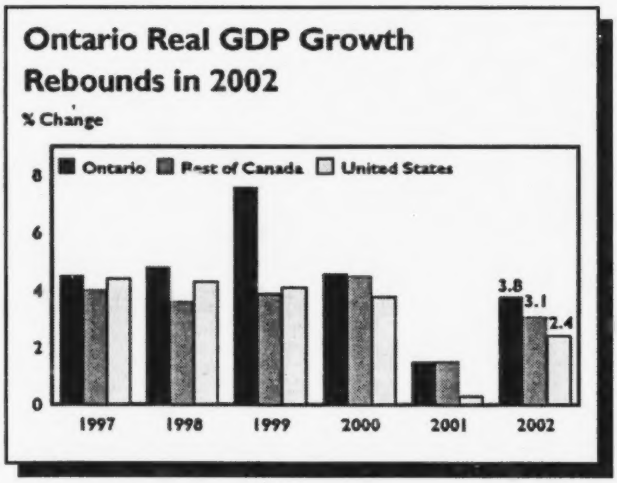
- **Housing market activity** soared 11.8% in 2002, the strongest gain in three years, with home resales and new housing construction advancing strongly.

- Business expenditures for **plant and equipment** rebounded 1.5% in 2002, following a 2.7% decline in 2001. Higher machinery and equipment investment more than offset a drop in non-residential construction.

- Responding to improving demand, Ontario businesses began accumulating **inventories** in 2002, after reducing stocks in 2001.

- **Export** growth rebounded by 2.9% in 2002, after falling 3.3% in 2001. A pickup in auto exports more than offset weaker machinery and equipment exports.

- Stronger domestic demand, especially household sector spending, led to a 4.0% jump in **real imports** in 2002. In particular, auto imports rebounded strongly in 2002.



- In current dollars, **nominal GDP** grew 5.1% in 2002, over twice the 2.4% pace of 2001. Prices as measured by the GDP price deflator rose 1.3% in 2002, up from the 0.9% increase in 2001.

- **By industry**, gains in 2002 were led by wholesale and retail trade (+6.6%) and finance and real estate (+5.1%). Manufacturing advanced 3.1%, propelled by a 9.3% jump in the auto industry.

- In the fourth quarter, **real output** increased at an annual rate of 1.3%, after averaging 5.2% growth over the first three quarters of the year. Consumer spending (+1.4%), government spending (+1.2%) and residential investment (+0.5%) contributed to overall growth, while Ontario's exports fell 1.6%.

- In the fourth quarter, **wholesale trade** (+2.9%), retail trade (+1.9%) and construction (+1.5%) made the most significant gains, while manufacturing fell 0.8%.

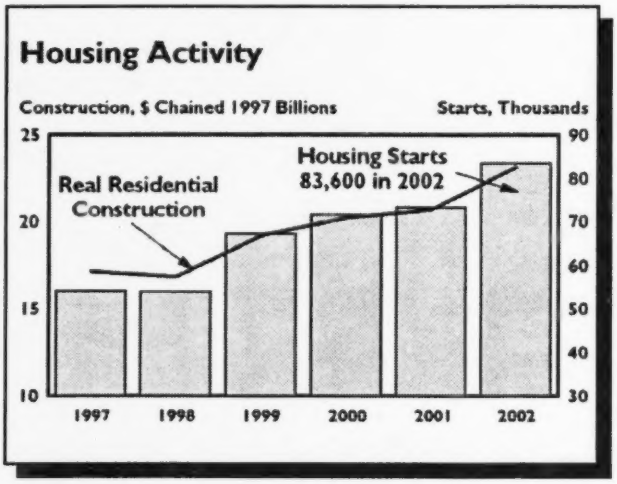
DEMAND AND INCOMES

ONTARIO HOUSEHOLDS SUPPORT ECONOMIC GROWTH IN 2002

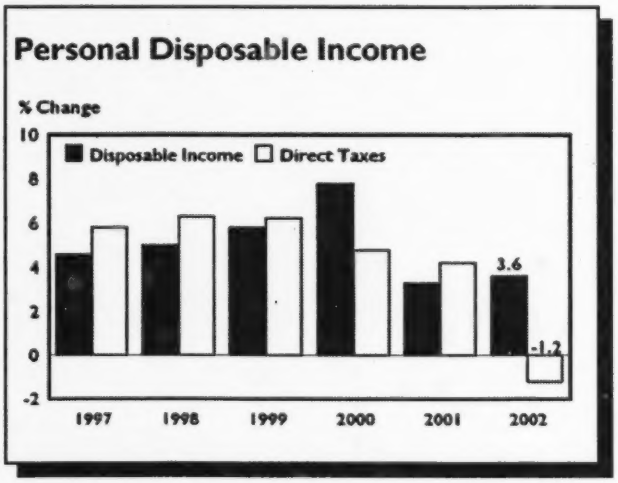
Ontario households spurred economic growth in 2002 with combined personal spending and residential investment accounting for over 60 per cent of total real growth. Real consumer spending rebounded strongly in 2002, increasing by 3.3 per cent as Ontarians benefited from reduced taxes, low interest rates and increased employment.



Spending on big-ticket durable goods such as autos, furniture and appliances increased strongly in 2002 stimulated by the strong housing market and competitive financing incentives for vehicles. Auto sales increased to record levels in 2002, boosting overall goods consumption by 4.1%, double the 2001 rate.

Spending on services also accelerated in 2002, growing by 2.7%, with purchases of communication services rising at a brisk pace.

Underpinning the strong household spending growth, was a 3.6% rise in personal disposable income in 2002, driven by continued growth in labour income, up 4.3% in 2002, and by a 1.2% drop in personal direct taxes.



Housing investment soared 11.8% in 2002, its strongest performance in three years. Conventional five-year mortgage rates averaged 7.0% in 2002, their lowest level in decades. Together with rising after-tax incomes, the low rates made housing more affordable for Ontario's growing population and helped boost the demand for new homes. In 2002, Ontario housing starts jumped over 14% to 83,600 units, the highest level of activity in over 13 years while the number of home resales increased by 9.3%.

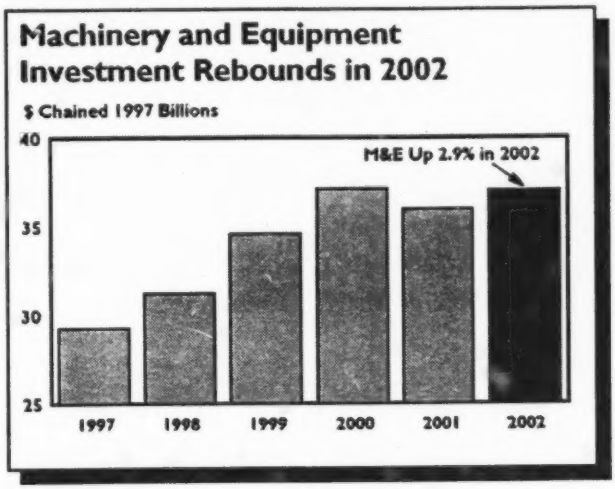
In the fourth quarter, consumer spending increased 1.4%, up from the 0.6% advance recorded in the third

quarter. Most categories of expenditures grew, led by a rebound in auto sales in the fourth quarter. Growth in both goods consumption (+2.0%) and service consumption (+1.0%) accelerated from slower third quarter spending.

Residential construction moderated from 2.7% growth in the third quarter to a 0.5% gain in the fourth quarter. The year-end level was 10.6% higher than at the end of 2001.

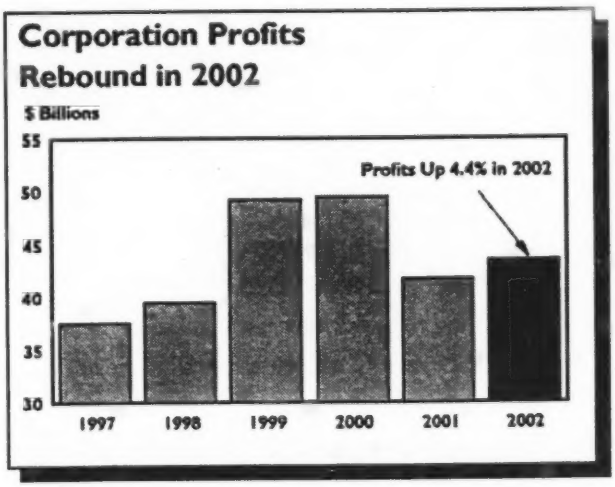
Business Investment Posts Modest Gains In 2002 While Profits Recover

Real business plant and equipment investment grew by 1.5% in 2002, rebounding from a 2.7% decline in 2001. The 2002 improvement was due to a 2.9% rebound in machinery and equipment spending, following a 3.1% decline in 2001. Machinery and equipment gains were concentrated in cars and trucks. This, along with increased real business expenditures on software, computers and office equipment, more than offset the continued weakness in telecommunications capital spending.



Business investment in non-residential structures declined 3.2% in 2002, after falling by 1.2% in 2001 and 4.1% in 2000.

Ontario pre-tax corporate profits increased 4.4% in 2002, partially recovering from the 15.6% decline in 2001. Growth was concentrated in the non-financial sector with manufacturers, wholesalers and retailers all reporting higher profits for the year.

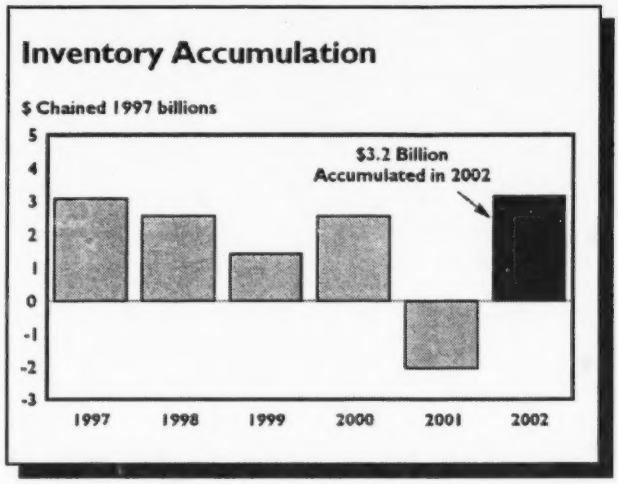


In the fourth quarter, real business plant and equipment investment remained unchanged following a 0.5% increase in the third quarter. A 0.2% increase in non-residential construction was offset by a 0.1% drop in machinery and equipment investment in the fourth quarter.

Pre-tax corporate profits rose 2.4% in the fourth quarter of 2002, the fourth consecutive quarter of profit growth.

Inventory Levels Rise In 2002

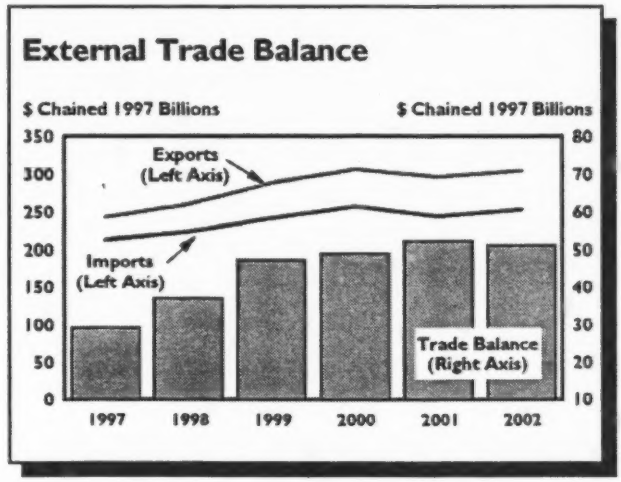
Ontario businesses accumulated inventories in 2002 following inventory reductions during 2001. Boosted by rising foreign and domestic demand, businesses added $3.2 billion to total business stocks, reversing the $2.0 billion drop in 2001 inventory levels. Manufacturers, wholesalers and retailers all increased inventory levels. The largest contributor was the rebuilding of motor vehicle stocks throughout the year.



The inventory build-up accelerated in the fourth quarter of 2002 with an accumulation of $6.4 billion, the third consecutive quarterly rise in stocks in 2002 and the largest since mid-1995. While increases in stocks were widespread across manufacturing, retailing and wholesaling sectors, retail motor vehicle inventories dominated, boosted by increased motor vehicle imports in the final quarter of 2002.

Exports Rebound in 2002 as US Economy Recovers

Ontario real exports, (which include both international and interprovincial exports) rebounded by a solid 2.9% in 2002, after declining by 3.3% in 2001. The recovery of the U.S. economy in 2002, with growth of 2.4%, in comparison to the 0.3% growth of 2001, contributed to the rebound of Ontario's exports. Much of the increase came from stronger automotive exports to the U.S., as car sales remained strong with 16.7 million units purchased in 2002. Also contributing to the export rebound were industrial goods and materials. This was partially offset by reduced machinery and equipment exports, the result of continuing weakness in the export of telecommunications and computer- related products.



Ontario real imports increased 4.0% in 2002, after falling 5.3% in 2001. The gain was a reflection of the acceleration in domestic demand in 2002, which in turn was driven by strong growth in household spending as well as increased imports of auto parts associated with strong auto assembly growth.

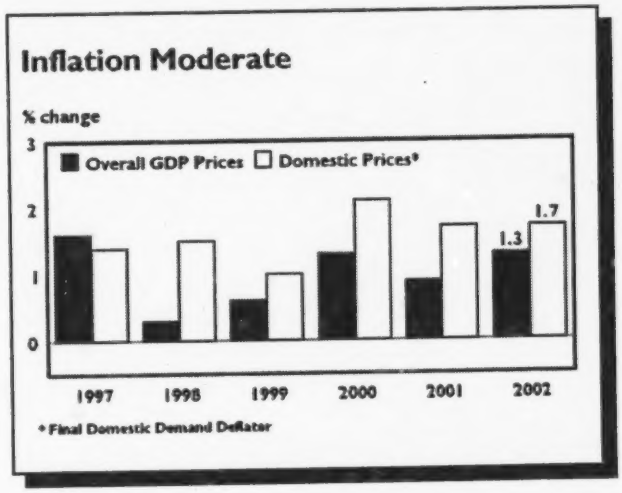
Imports of automotive products and consumer goods were noticeably stronger in 2002. These, along with increased energy imports, more than offset weaker machinery and equipment imports in 2002.

Real exports fell 1.6% in the fourth quarter, following three quarters of growth. The drop was due primarily to reduced motor vehicle exports which had been rising strongly earlier in 2002. U.S . consumer spending on motor vehicles declined by 6.2% in the quarter.

Real imports were little changed, growing 0.2% in the fourth quarter of 2002, after three consecutive quarters of growth, averaging 2.8%. Stronger energy and motor vehicle imports were offset by weaker auto part and machinery and equipment imports.

INFLATION REMAINS MODEST IN 2002

Average prices, as measured by the GDP price deflator, rose 1.3% in 2002, up from the 0.9% rise in 2001.



Higher prices were recorded for consumption (+1.5%), housing (+4.8%), and government spending (+2.1%). Export and import prices were relatively stable, rising just 0.3% and 0.5% respectively. While energy prices increased throughout the year, the overall price movement on an annual basis was lower in 2002 than in 2001. In addition, non-energy import prices, remained relatively stable in 2002, while prices for imports of services declined. Machinery and equipment prices fell 0.1%, mainly as a result of lower computer and software prices.

In the final quarter of 2002, prices rose 1.0%, following an average advance of 0.8% over the first three quarters.

ONTARIO PRODUCTION BY INDUSTRY

INDUSTRIAL PRODUCTION IN 2002

Ontario's industrial output grew by a strong 3.9% in 2002 following a 1.2% gain in 2001. The growth in 2002 was reflective of the strong domestic economy, with wholesale and retail trade (+6.6%) and finance and real estate (+5.1%) leading the advance. Manufacturing grew by 3.1% in 2002, propelled by a 9.3% jump in the auto industry, in turn the result of strong North American auto demand.

In the fourth quarter, wholesale trade (+2.9%), retail trade (+1.9%) and construction (+1.5%) made the most significant gains, while manufacturing stepped back 0.8%.

ONTARIO OUTPUT BY SECTOR
(% change from previous period, $ 1997)

Public Administration	4.1	-1.8	-1.5	-1.7	7.0	0.8
Ontario Output at Basic Prices ($1997)	**1.2**	**3.9**	**2.0**	**1.4**	**0.9**	**0.3**
(annualized rate on second line)			*8.4*	*5.6*	*3.8*	*1.4*

Note: Real Output by sector is measured as gross domestic product at basic prices using Laspeyres' price indices. A switch to the chain Fisher method of price deflation is scheduled for the fall of 2003.

Manufacturing Bounces Back

Manufacturing sector output grew 3.1% in 2002, rebounding solidly after a 5.6% loss in 2001, its first annual decline in a decade.

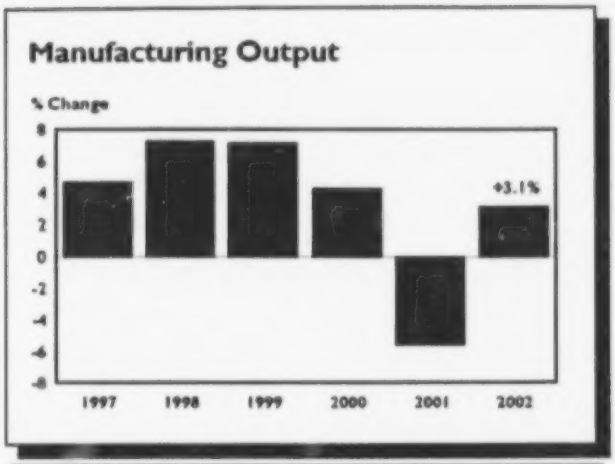
Spurred by growing U.S. and Canadian sales, auto industry output rose 9.3%, with parts manufacturing up 10.1% and auto assembly up 7.6%. The auto industry, which represents 21% of Ontario's manufacturing output, contributed almost 60% of manufacturing growth.

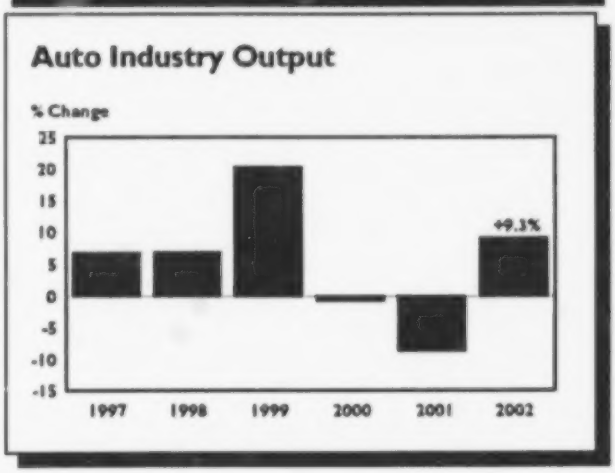
Other strong gains in manufacturing include primary and fabricated metal (+8.1%) and chemical and petroleum products (+9.0%).

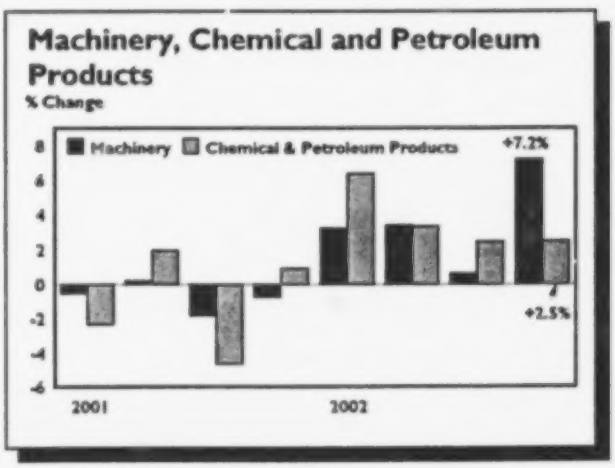
The strength of Ontario manufacturing translated into the creation of 32,100 jobs in the sector in 2002, more than erasing the 11,100 jobs lost in 2001.

In the fourth quarter, manufacturing output fell 0.8%, in part the result of a 2.6% decline in the auto sector as the industry adjusted to rising inventories. Electrical and electronic products output fell 3.3% in the fourth quarter, continuing the downward trend which began in 2001.

These losses were offset by fourth quarter gains in machinery manufacturing (+7.2%) and in chemical and petroleum products (+2.5%).







Big Ticket Consumer Purchases Drive Retail and Wholesale

Wholesalers' output jumped 7.5% in 2002, following an advance of 1.2% in 2001. Strong sales in the automotive and lumber and building materials sectors boosted the overall sector.

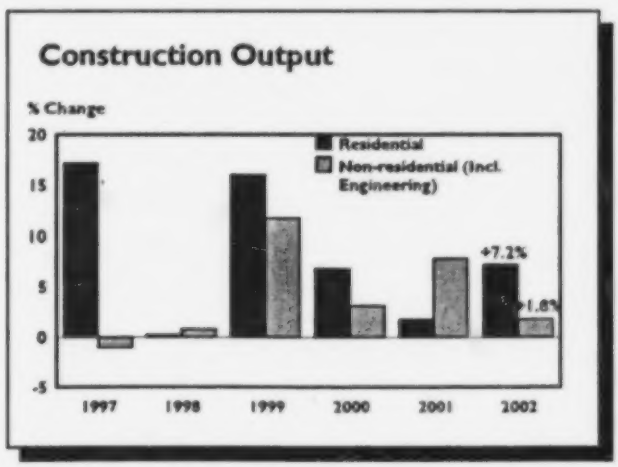
Similarly, retailing activity jumped 5.6% in 2002, following 2.5% growth in 2001. Sustained by the strong housing market, furniture stores reported their best year since 1987.

In the fourth quarter, the combined solid growth of both wholesale (+2.9%) and retail (+1.9%) contributed nearly 90% of overall industry production growth.

Since 1996, Ontario retailing and wholesaling have grown at average annual rates of 6.9% and 7.6% respectively, compared to 4.4% for the total economy.

Solid Construction Performance

Construction activity rose 3.8% in 2002, marking the sixth consecutive year of growth, a performance not equaled even during the 1980s construction boom.



Residential construction surged 7.2% in 2002, its strongest result in three years, as low interest rates stimulated housing demand, which pushed housing starts to their highest level since 1989.

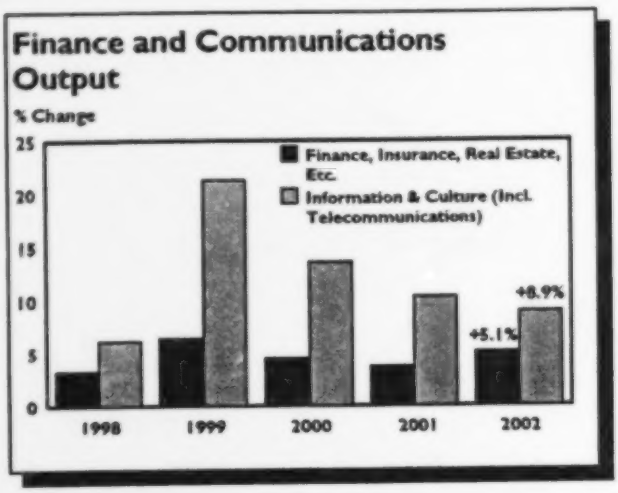
Non-residential construction (including engineering) rose 1.8% after surging 7.8% in 2001. Growth in this industry was led by the institutional sector, including hospitals, universities and colleges.

In the fourth quarter, non-residential construction rose 3.5%, ending three quarters of decline. The value of non-residential building permits jumped almost 14% in the fourth quarter, the strongest such gain in

more than two years. Residential construction stepped back 1.6% in the fourth quarter from the previous quarter's record peak of more than $8 billion.

Finance and Communications Keep Growing

Production in the finance, insurance, real estate and rental industry rose 5.1% in 2002, buoyed by unprecedented real estate activity as home resales jumped 9.3% to reach a record of 177,000 units sold. In the fourth quarter, in spite of continued strength in home resales, the financial industry output declined 0.4% as investors grew increasingly cautious in reaction to low returns on the financial markets.

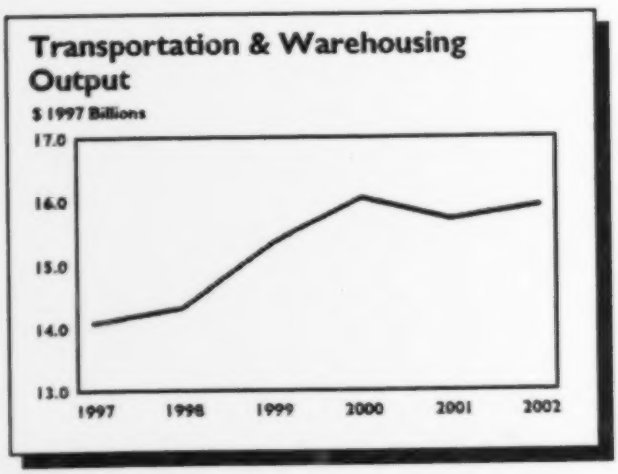


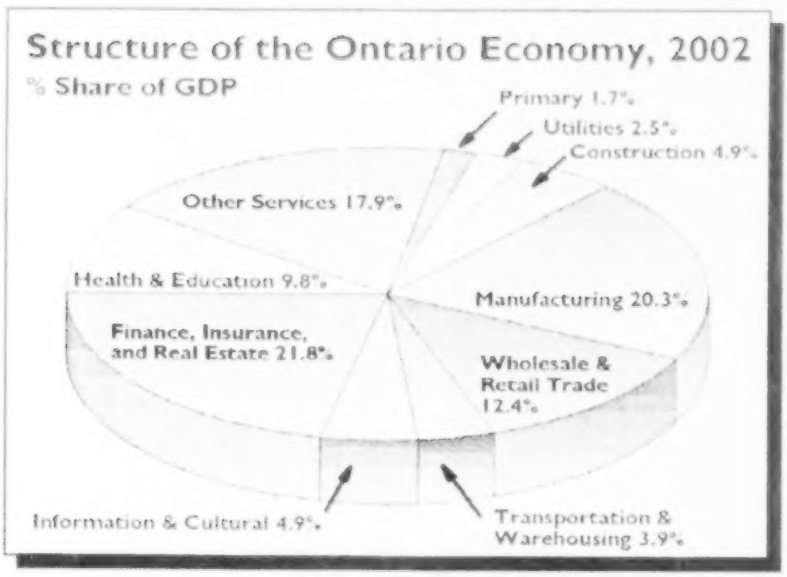
Output of the information and culture sector (which includes the telecommunications industry) advanced 8.9% in 2002 after growing at an average annual rate of 15% since 1998.

Other Services Producing Industries

The transportation and warehousing sector rose 1.4% in 2002 but failed to recoup all the losses which were incurred in 2001 by the aviation industry.

Public administration output growth decelerated to 1.8% in 2002 after reaching 4.1% in 2001.





Structure of the Ontario Economy, 2002
% Share of GDP
Primary 1.7%
Utilities 2.5%
Construction 4.9%
